9. General Conditions

9.1 The examiners shall be appointed by the University on the recommendations of the Board of Studies / Faculty of Physiotherapy.

Provided that:

(i) The senior most teacher in a subject who has taught the students for at least six months shall be appointed as internal examiner. No person below the rank of Reader / Assistant Professor in the subject of Degree Level institution shall be appointed as an Internal Examiner. However, in compelling circumstances a Senior Lecturer / Lecturer with at least three years of teaching experience in the subject may be made an Internal Examiner. All examiners / papers setters to be appointed must be teaching / have taught in B.P.T. Classes.

(ii) External Examiner shall be appointed only from the teaching staff of Physiotherapy College outside the State of Punjab.

(iii) The University may get each paper set from External Examiner only. The moderation of question papers may be got done under the direction of the Vice-Chancellor, if necessary.

(iv) The practical examination shall be conducted jointly by the internal examiner of the respective institution and the external examiner for that institute.
(v) The award list duly signed by both the examiners would be submitted to the University immediately after the conduct of examination. A copy of the result of practical examination would be kept by the Internal Examiner for six months for reference and record.

vi) In order to maintain secrecy the evaluation of answer books shall be got evaluated by putting fictitious roll numbers thereon-spot evaluation (table marking) or any other method under the direction of the Vice-Chancellor.

10. The Internal Assessment shall be determined by Head of the Department concerned based on the student's class work, home work, house examination records and participation in co-curricular activities and the same duly countersigned by the Principal shall be submitted to the University about two weeks before the commencement of the examination.

11. The Registrar / Controller of Examinations shall publish the result after the examination. The candidates shall be issued Detailed Marks Certificate through their Principals. The Degree of Bachelor of Physiotherapy (B.P.T.) shall be awarded by the University on successful completion of six months compulsory rotatory internship, duly certified by the Principal of the College.

12. Migration

A student of any Physiotherapy College who has
may be permitted to migrate from one College to another under the jurisdiction of Baba Farid University of Health Sciences, Faridkot, and from any other University to BFUHS in 1st, 2nd, 3rd, or 4th Prof. BPT course on the following conditions:

a) The student has to apply for migration to the University within two months from the declaration of his/her previous Prof. B.P.T. result.

b) The applicant student will be permitted to migrate if a vacant seat is available in the College where he/she wants to migrate.

c) The applicant's total aggregate marks should not be less than the lowest marks obtained by a student of the college to which the migration is sought. This will be applicable only to the applicants seeking inter-university migration.

d) The applicant must submit 'No Objection Certificate' from both the Principals.

e) An applicant who has passed the 1st, 2nd or 3rd Prof. BPT exam. from another University and seeks migration to a college of Physiotherapy under BFUHS, he/she may be considered if the above mentioned conditions are fulfilled and equivalence of the subjects covered during previous years is established.

f) Notwithstanding anything contained in the above rules, if an applicant does not fulfil any of the conditions given above, the Vice-
under exceptional circumstances to another College.

13. The grace marks up to a maximum of five marks may be awarded at the discretion of the University to a student who has failed only in one subject but has passed in all other subjects.

14. All the candidates shall complete 300 teaching hours in Clinical Training during the course.

15. Compulsory Internship

15.1 All the students after passing Final Prof. B.P.T. examination shall go in for six months supervised compulsory rotatory internship in the following areas:

| i)  | Physiotherapy Out-Patient Department | 1 month |
| ii) | ICU & ICCU                          | 15 days  |
| iii) | General Medicine                    | 15 days  |
| iv) | General Surgery                     | 15 days  |
| v)  | Paediatrics                          | 15 days  |
| vi) | Cardiology                           | 15 days  |
| vii) | Neurology                            | 15 days  |
| viii) | Neurosurgery                        | 15 days  |
| ix) | Cardiothoracic surgery               | 15 days  |
| x)  | Orthopaedics                         | 15 days  |
| xi) | Physical Medicine & Rehabilitation   | 15 days  |

All efforts should be made to ensure that the BPT Intern gets posted to the above mentioned disciplines for the duration indicated. However, where some of the above facilities are not existing, efforts for attachments with the Institutions affiliated with BFUHS where these are available should be made. Failing these, the Interns may be posted in those disciplines which closely match the
missing disciplines, for the Internship posting.

15.2 After completion of internship the concerned Principal will certify that the student has satisfactorily completed internship. Thereafter the student will be eligible for award of the degree of Bachelor of Physiotherapy (B.P.T.) by BFUHS.

15.3 All the students of Baba Farid University of Health Sciences, Faridkot, will complete their internship in their parent Colleges.

15.4 Under some exceptional circumstances a student may be permitted to complete his internship in another affiliated Physiotherapy College if Principals of both the colleges give their consent and the University issues No Objection Certificate to this effect. This would be allowed only if a seat is vacant in the college in which the student wants to complete his internship.

15.5 A candidate from a Physiotherapy College other than those affiliated with Baba Farid University of Health Sciences, Faridkot is allowed to do Internship in a college affiliated with Baba Farid University of Health Sciences, Faridkot provided a seat is lying vacant in the college in which the student wants to complete his internship & if Principals of both the colleges give their consent and the University issues No Objection Certificate to this effect.

15.6 All the students shall start their internship
Under exceptional circumstances, if a student cannot do so, he/she will have to take special permission of the University on the recommendations of the Principal.
BPT Syllabus

Detailed Syllabus B.P.T 1st Year

(Total Theory + Practical/Clinical = 1000 hours)

Paper – I ANATOMY

Time: 3 Hrs.

Theory: 80+ 20 Int. Assess. = 100
Practical: 80+ 20 Int. Assess = 100

Teaching hours: Theory = 130, Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with answer to each question up to five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question up to three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question up to 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:

Same as in Section A.

Section-I General Introduction: 15 Hrs

1. Histology – Theory & microscopic sections of loose connective tissue, dense connective tissue (tendons & ligamentum nuchae), epithelium, areolar tissue, adipose tissue, hyaline, elastic & fibrous cartilage, compact & spongy bone, bone marrow, skeletal, smooth & cardiac
muscle, nerve, lymph node etc.

3. General Embryology – Development of muscles, bones, joints & nerves etc.

Section – II Systems of the Human Body: 40 Hrs

2. Respiratory System – Anatomy of upper & lower respiratory tract including nose, larynx, trachea, bronchi, pleura & lungs. Also, muscles of normal & forced respiration. Description of intercostal spaces with surface markings.

3. Digestive System - Anatomy of the gastro intestinal tract with special emphasis on surface marking.

5. Endocrine System - The various endocrine glands with their structure, functions and neuro-regulation. Also role of hypothalamus.

6. Integumentary System

Section – III Neuro-anatomy: Microscopic and gross study of: 20 Hrs

1. Peripheral Nerves 2. Neuromuscular Junction
5. Brainstem 6. Cerebellum
7. Inferior colliculi 8. Superior Colliculi
11. Epithalamus 12. Thalamus
Section – IV Musculo Skeletal System  40 Hrs

(A)  Myology:
1. The fascia and muscles of upper limb.
2. The fascia and muscles of lower limb.
3. The fascia and muscles of trunk.
4. The fascia and muscles of head, neck and face.
5. Muscles of eye.

(B)  Osteology & Arthrology:
1. General structure and classification of all bones of skeleton and their attachments.
2. Classification of joints.
5. Joints of Upper Limb.
7. Shoulder girdle
8. Pelvic Girdle

7.  Section – V Surface & Radiological Anatomy:  15 Hrs
Anatomy Practical

1. Surface Anatomy: To study, identify and mark the surface landmarks on human body.
2. To study the muscles of trunk, lower and upper extremities and face on a dissected human body.
3. To study the Bones of Human Body with special emphasis on origin and insertion of muscles & ligaments.
4. To study the anatomy of joints of upper and lower extremities and vertebral column on a dissected human body.
5. To study the anatomy of C.N.S. and P.N.S. on a dissected human body.
6. To study the gross anatomy of Respiratory, Digestive, Endocrine, Urinary and Genital system on a dissected human body.

Books Suggested:

2. B.D.Chaurasia, Human Anatomy - Volume 1,2,3, CBS Publishers & Distributors.
3. Meminn's Last's Anatomy - Regional and applied, Churchill Livingstone.
Paper – II PHYSIOLOGY

Time: 3 Hrs.
Theory: 80+ 20 Int. Assess. = 100
Practical: 80+ 20 Int. Assess  = 100
Teaching hours: Theory = 120, Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:

Same as in Section A.

Section – I General Introduction: 20 Hrs

2. Skin: Functions, blood of flow and temperature regulation.

Section – II Physiology of the system of the body: 45 Hrs

1. Digestion: Control of food and water intake and secretion and absorption movements of the alimentary canal.
2. Circulation: Cardio-vascular system, mechanical and electro-physiological activity of the heart, regulation of heart, coronary circulation, haemodynamics, circulation through brain, skin and skeletal muscle.
3. Excretion: Renal functions including formation of Urine & Micturition.
4. Respiration: Respiratory gases, pulmonary gas exchange, control and mechanics of breathing, hypoxia, asphyxia, dyspnoea, oxygen therapy and resuscitation.
5. Endocrine System: Outline of various hormones and their actions, pituitary gland, thyroid, parathyroid, adrenal glands & Gonads.
6. General Metabolism: Carbohydrate, Protein & Fat Metabolism.

mechanism in movement behaviour, strength, endurance, analysis of movement.

2. Circulatory and respiratory response to exercise including effects on the heart blood circulation body fluid changes, pulmonary -ventilation, gas exchange and transport, etc.

3. Effects of exercise and work on other body functions.

5. Effects of Exercise training - endurance, fatigue and recovery.

6. Fitness and health - age sex, body type, race, stress and medical aspects of exercise.

**PHYSIOLOGY PRACTICAL**

To study the following physiological Phenomena:
Identification of blood cells and different counts.

1. W.B.C. Count.
2. R.B.C. Count.
3. Haemoglobin percentage and color index.
4. E.S.R. and Blood groups.
5. Bleeding time and clotting time.
6. Respiratory efficiency tests.
7. Artificial respiration and C.P.R.
8. Pulse rate, heart rate and measurement of Blood Pressure.
9. Respiratory rate and Ausculation.
10. Normal E.C.G.
12. Sensations.

Tests for functions of Cerebellum

**Books Suggested:**

1. Textbook of Medical Physiology - Arthur Guyton (Mosby.)
6. Textbook of Practical Physiology - Gai- Jaypee

**Paper – III BIOCHEMISTRY**

*Time: 3 Hrs.*

*Teaching hours: Theory = 50*

**Note:** The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

**Section A:**

**Question 1:** This will consist of Five short answer questions with answer to each question up to five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

**Question 2:** This will consist of one medium answer question with answer to each question up to three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

**Question 3:** This will consist of two long answer questions with answer to each question up to 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

**Section B:**

Same as in Section A.

1. Biophysics: Concepts of pH and buffers, acid base equilibrium osmotic pressure and its physiological
applications.  
2 Hrs

2 Hrs

3. Carbohydrates: Definition, functions, sources, classifications, Monosaccharides, Disaccharides, Polysaccharides, mucopolysaccharide and its importance.  
2 Hrs

4. Lipids: Definition, function, sources, classification, simple lipid, compound lipid, derived lipid, unsaturated and saturated fatty acid. Essential fatty acids and their importance, Blood lipids and their implications, cholesterol and its importance.  
2 Hrs

5. Proteins Definition, sources, classification, simple protein conjugated protein, derived proteins and its, properties.  
2 Hrs

6. Nucleic acid: Structure and function of DNA and RNA, Nucleosides, nucleotides, Genetic code, biologically important nucleotides.  
3 Hrs

7. Enzymes: Definitions, classification, mode of action, factor affecting enzyme action, clinical importance of enzyme.  
2 Hrs

3 Hrs

9. Bioenergetics: Concept of free energy charge, Exergenic and endogenic reaction, concepts regarding energy rich compounds, Respiratory chain and Biological oxidation.  
3 Hrs

4 Hrs

11. Lipid Metabolism: Fatty acid oxidation, Fatty acid synthesis, Metabolism of Cholesterol, Ketone bodies, Atherosclerosis and obesity.  
4 Hrs

12. Protein Metabolism: Transamination, Transmethylation,
Deamination, Fate of ammonia, urea synthesis and synthesis of creatine, inborn errors of metabolism. **4 Hrs**

13. Water and Electrolyte Fluid compartment, daily intake and output sodium and potassium metabolism. **3 Hrs**

15. Connective tissue: Mucopolysaccharide connective tissue proteins, glycoprotein, chemistry and Metabolism of bone. **2 Hrs**

16. Nerve tissue: Composition, metabolism, chemical mediators of Nerve activity. **2 Hrs**

17. Hormones: General characteristics and mechanism of Hormone action insulin, glucagone Thyroid and Parathyroid hormones, cortical & sex hormones. **3 Hrs**

18. Isotopes: Isotopes and their role in treatment and diagnosis of diseases. **2 Hrs**

**Books Suggested:**

1. Medical Biochemistry for Physiotherapy students- Harpreet Kaur-- Jaypee Brothers.
5. Biochemistry by Southerland - Churchill Livingstone

**Paper – IV ELECTROTHERAPY - I**

Time: 3 Hrs.

Theory: 80+ 20 Int. Assess. = 100
Practical: 80+ 20 Int. Assess = 100

Teaching hours: Theory = 100, Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

**Section A:**

**Question1:** This will consist of Five short answer questions with
answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

**Question 2:** This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

**Question 3:** This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

**Section B:**

Same as in Section A.

**Section I Physical Principles:** 20 Hrs

Structure and Properties - of matter - solids, liquids and gases, adhesion, surface tension; viscosity, density and elasticity.

Structure of atom, molecules, elements and compounds.

Election theory, static and current electricity.

Conductors, Insulators, Potential difference, Resistance & Intensity.

Ohm's Law - Its application to AC & DC currents.

a) Rectifying Devices - Thermionic Valves, Semiconductors; Transistors, Amplifiers, Transducers Oscillator circuits.

b) Capacitance, condensers in DC and AC circuits.

c) Display devices & indicators - analogue & digital.

Effects of Current Electricity:

1. Chemical effects - Ions and electrolytes, Ionisation, Production of a E M.F. by chemical action.

3. Milli ammeter and Voltmeter, Transformers and Choke Coil.

4. Physical Principles of sound and its properties.

5. Physical Principles of light and its properties.
6. Electromagnetic spectrum - biophysical application.

Section – II

Electrical supply: 5 Hrs

a) Brief outline of main supply of electric current.
b) Dangers - short circuits, electric shocks.
c) Precautions - safety devices, earthing, fuses etc.
d) First aid & initial management of electric shock.

Section – III

Low Frequency Currents: 35 Hrs

1. Introduction to direct, alternating & modified currents.
2. Production of direct current - Physiological and therapeutic effects of constant current, anodal and cathodal Galvanism, Ionisation and their application in various conditions.
4. Modified direct current - various pulses, duration and frequency and their effect no Nerve and Muscle tissue. Production of interrupted and surged current & their effects.
5. Modified direct current - Physiological and therapeutic effects, principles of clinical application indications, contra indications, precautions, operational skills of equipment & patient preparation.
6. Transcutaneous Electrical Nerve Stimulations (TENS):
   a. Types of Low Frequency, pulse widths, frequencies & intensities used as TENS applications.
   b. Theories of pain relief by TENS.

Section-IV

Electrical Reactions and Electro - diagnostic tests: 10 Hrs

Electrical Stimuli and normal behaviour of Nerve and muscle tissue.
Types of lesion and development of reaction of degeneration.

Faradic - Intermittent direct current test.

S.D. Curve and its application.
Chronaxie, Rheobase & pulse ratio.

Section-V

20 Hrs

1. Infra red rays - Wavelength, frequency, types & sources of IRR generation, techniques of irradiation, physiological & therapeutic effects, indications, contraindications, precautions, operational skills of equipment & patient preparation.

2. Ultra - violet rays (UVR):
   c. Wavelength, frequency, types & sources of UVR generation, techniques of irradiation, physiological & therapeutic effects, indications, contraindications, precautions, operational skills of equipment & patient preparation.
   d. Dosimetry of UVR.

Section-VI

Superficial heat - Paraffin wax bath, moist heat, electrical heating pads 10 Hrs

a) Mechanism of production.
b) Mode of heat transfer.
c) Physiological & therapeutic effects.

Indications, contraindications, precautions, operational skills of equipment & patient preparation.

Electrotherapy – I (Practical)

1. To study the basic operation of electric supply to the equipment & safety devices.

2. To experience sensory and motor stimulation of nerves and muscles by various types of low frequency currents on self.

3. To locate and stimulate different motor points region wise, including the upper & lower limb, trunk free.

4. Therapeutic application of different low frequency currents Faradic foot bath, Faradism under pressure,
Ionotophoresis.

5. To study the reactions of degeneration of nerves, to plot strength duration curves.
6. To find Chronaxie and Rheobase.
7. To study a hydro collator unit, its operations and therapeutic application of Hot packs - region wise.
8. To study the various types of Infrared lamps and their application to body region wise.
9. To study a paraffin wax bath unit, its operation and different methods of application - regions wise.
10. To study the different types of Ultra violet units, their operation, assessment of test dose and application of U.V.R. - region wise.
11. To study a TENS Stimulator, its operation and application - region wise.

Books Suggested:

2. Clayton’s Electrotherapy, (9th edi.) Forster & Palastanga Bailliere Tindall.
3. Therapeutic Heat and Cold - Lehmann - Williams & Wilkins.
5. Textbook of Electrotherapy – Jagmohan Singh - JAYPEE Bros, New Delhi

---

**EXERCISE THERAPY - I**

Time: 3 Hrs.

Theory: 80+ 20 Int. Assess. = 100

Practical: 80+ 20 Int. Assess = 100

Teaching hours: Theory = 100, Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

**Section A:**

**Question 1:** This will consist of Five short answer questions with...
answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:
Same as in Section A.

Section-I
Introduction to Exercise therapy, Principles, techniques and general areas of its application, Assessment & its importance.
Description of Fundamental starting positions and derives position including joint positions, muscle work, stability, effects and uses.
Introduction to Movements including analysis of joint motion, and muscle work.
Classification of movements - Describe the types, technique of application, indications, contraindication, effects and uses of the following:
a) Active movement  
b) Passive movement
c) Active assisted movement  
d) Resisted movement
e) To study the principles, techniques of application indication, precaution, effects and uses of Suspension Therapy.

Section – II  Manual Muscle Testing  10 Hrs
  a) Principles and application techniques of Manual muscle testing.
  b) Testing position, procedure and grading of muscles of the upper limb, lower limb and trunk etc.

Section – III  Goniometry  10 Hrs
Goniometers and its types
  a) Principles, techniques and application of Goniometry.
  b) Testing position, procedure and measurement of R.O.M.
of the joints of upper limbs, lower limbs and trunk.

Section - IV  Soft Tissue Manipulation (Therapeutic Massage) 20 Hrs

a) History, various types of soft tissue manipulation techniques.

b) Physiological effects of soft tissue manipulation on the following systems of the body, Circulatory, Nervous, Musculoskeletal, Excretory, Respiratory, Integumentary system and Metabolism.

c) Classify, define and describe: - effleurage, stroking, kneading, petrissage, deep friction, vibration and shaking etc.

e.) Preparation of patient: Effects, uses, indications and contraindications of the above manipulation.

Section - V  Motor Learning 10 Hrs

I. Introduction to motor learning
   i. Classification of motor skills.

II. Introduction to motor control
   i. Theories of motor control.
   ii. Applications.

III. Learning Environment
   i. Learning of Skill.
   ii. Instruction & augmented feed back.
   iii. Practice conditions.

Section – VI  Relaxation & Therapeutic Gymnasium 10 Hrs

Relaxation:
  1. Describe relaxation, muscle fatigue, muscle spasm and tension (mental & physical)
  2. Factors contributing to fatigue & tension
  3. Techniques of relaxation (local and general)
  4. Effects, uses and clinical application
  5. Indication & contraindication.

Therapeutic Gymnasium

I. Setup of a gymnasium & its importance.

II. Various equipment in the gymnasium.

Operational skills, effects & uses of each equipment.
Exercise Therapy Practical

1. To practice all the soft tissue manipulative techniques region wise - upper limb, lower limb, neck, back and face.
2. To practice the measurement of ROM of joints - upper limb, lower limb & trunk.
3. To practice the grading of muscle strength region wise - upper limb, lower limb and trunk.
4. To study the position of joints, muscle work and stability of various fundamental and derived positions.
5. To study the different types of muscle contraction, muscle work, group action of muscles and coordinated movements.
6. To practice the various types of suspension therapy and its application on various parts of body - region wise.
7. To study & practice local & general relaxation techniques.
8. To study the structure & function alongwith application of various equipment in a gymnasium.

Books Suggested:

2. Therapeutic Exercise - Basmajian - Williams and Wilkins.
9. Muscle testing and functions - Kendall - Williams & Wilkins.

**Paper – VI Computer Applications (Practical)**

M.Marks : 50

Teaching Hours: 50 Hrs (Practicals)

**Note:** Only Practical examination will be conducted for this paper.

- To study the various components of a personnel computer.
- To have working knowledge of various hardwares and softwares.
- To have working knowledge of Common Operating Systems.
- To practice the operational skills of common computer applications, including work processing and spread sheet software.
- To have a basic knowledge of utility of multi-media.
- To learn skills of web surfing – For literature, researches relevant to the field of medicine.
Paper- VII English (Theory)

M. Marks: 50 (Theory)
Teaching Hours – 50 hours

**Course Description:** The Course is designed to enable students to enhance ability to comprehend spoken and written English (and use English) required for effective communication in their professional work. Students will practice their skills in verbal and written English during clinical and classroom experiences.

- Media, audio, video, speeches etc. | **Exercise on:**  
- Listening to audio, video, tapes and identify the key points. | **Assessment of the skills based on the check list.** |
Detailed Syllabus

BPT Second Year

(Total Theory + Practical/Clinical = 1000 hours)

Paper – I Pathology & Microbiology

Time: 3 Hrs.  
Theory: 80+ 20 Int. Assess. = 100  
Total Teaching hours: Theory = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A: PATHOLOGY

Question 1: This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B: MICROBIOLOGY

Same as in Section A.

SECTION I PATHOLOGY

Teaching Hours: 60 Hrs

1. Introduction : Concepts of diseases, classification of lesions.
2. Bacterial, viral and parasitic infections – a general outline.
3. Inflammation and repair, degeneration, necrosis and gangrene.
5. Tuberculosis, Leprosy, Typhoid.
11. Skin: Leprosy.
12. Urinary System.
15. Sclerodema and Psoriasis.
16. Diseases of muscle including poliomyelitis, Myopathies.
17. Volkmann’s Ischaemia

Section II Microbiology
Teaching Hours: 40 Hrs

1. Introduction and history of microbiology.
   (a) Classification
   (b) Shape and arrangement.
   (c) Special characteristics – spores, capsules, enzymes, motility, reproduction.
3. Disinfection and antiseptics.
4. Sterilization and asepsis.
5. Antibacterial agents - fundamental aspect, susceptibility tests.
6. Infection - source of infection, portals of entry, spread of infection.
7. Non-specific immunity.
9. Allergy and hypersensitivity.
10. Outline of common pathogenic bacteria and diseases produced by them. Treatment and prevention.
   (i) Respiratory tract infections.
   (ii) Meningitis.
   (iii) Enteric infections.
   (iv) Anaerobic infections.
   (v) Urinary tract infections.
   (vi) Leprosy, tuberculosis and miscellaneous infections.
   (vii) Wound infections.
   (viii) Sexually transmitted diseases.
   (ix) Hospital acquired infections.
11. Pathogenic yeast's and fungi
12. Virology - Virus infections with special mention of Hepatitis, Poliomyelitis and Rabbies.

Books Suggested:
1. Robbins Pathological Basis of Disease - Cotran, Kumar & Robbins - W.B. Saunders.
2. General Pathology - Walter & Israel - Churchill Livingstone.
5. Pathology: Implications for Physical Therapists - Godmann and Boissonault - W.B. Saunders.
7. Medical Microbiology - Mims - Jaypee Brothers.

Paper – B Pharmacology

Time: 3 Hrs.  
Theory: 40+ 10 Int. Assess. = 50  
Teaching hours: Theory = 50

Note: The question paper covering the entire course shall be divided into one section.

SECTION – Basic Pharmacology  
Teaching Hours: 50 Hrs

1. General action of drugs.
2. Drug allergy and idiosyncracy
3. Drug toxicity.
5. Methods of administration.
6. Chemical character of drugs.
7. Common Drugs acting on Central nervous system, Peripheral nervous system, Neuromuscular junction and muscles.
8. Common Drugs acting on cardio-respiratory system.
Books Suggested:

Paper – III Electrotherapy – II

Time: 3 Hrs.  
Theory: 80+ 20 Int. Assess. = 100  
Practical: 80+ 20 Int. Assess = 100  
Teaching hours: Theory = 150, Practical = 150  

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:

Same as in Section A.

SECTION – I  

30Hrs

1. Review of Neuro – muscular Physiology including effects of electrical stimulation.
2. Physiological responses to heat gain or loss on various tissues of the body.
3. Therapeutic effects of heat, cold and electrical currents.
5. Physics of sound including characteristics and propagation.
Section II

1. High frequency currents (S.W.D. & M.W.D.) - Production, biophysical effects, types, therapeutic effects, techniques of application, indications, contraindications, precautions, operational skills and patient preparation.

2. Medium frequency currents (Interferential therapy) - Conceptual framework of medium frequency current therapy, production, biophysical effects, types, therapeutic effects, techniques of application, indications, contraindications, precautions, operational skills and patient preparation.

3. High frequency sound waves (Ultrasound) - Production, biophysical effects, types therapeutic effects, techniques of application, indications, contraindications, precautions, operational skills and patient preparation.

Section III

1. Therapeutic light in Physiotherapy (LASER) - Definition, historical background, physical principles, biophysical effects, types, production, therapeutic effects, techniques of application, indications, contraindications, precautions, operational skills and patient preparation.

2. Therapeutic cold (Cryotherapy) - Sources, biophysical effects, types, therapeutic effects, indications, contraindications, precautions, application technique and patient preparation.

3. Therapeutic mechanical effects, indications, contraindications, precautions, operational skills and
patient preparation.

Section IV

20 Hrs

1. Electro-diagnosis – Instrumentation, definition & basic techniques of E.M.F. and E.N.G.

ELECTROTHERAPY – II (PRACTICAL)

1. To study a short wave diathermy unit, its operation and different methods of application - regionwise.

2. To study a Micro wave diathermy unit, its operation and different methods of application – regionwise.

3. To study an Ultrasound unit, its operation and different methods of application – regionwise.

4. To study a Laser unit, its operation and different methods of application – region wise.

5. To study various forms of therapeutic cold application region wise including – ice, cold packs, vapour coolant sprays etc.

6. To study a Intermittent therapy unit, its operation and different methods of application – regionwise.

7. To study a Intereferential pneumatic therapy unit, its operation and different methods of application – regionwise.

8. To observe various Electro – myography (EMG) procedures.
9. To observe various Electro – neurography (ENG) procedures.

10. To study a Bio feedback unit, its operation and different methods of application – regionwise.

Books Suggested:

Paper –IV Exercise Therapy – II

Time: 3 Hrs.  
Theory: 80+ 20 Int. Assess. = 100  
Practical: 80+ 20 Int. Assess = 100

Teaching hours: Theory = 150, Practical = 150

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with answer to each question up to five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question up to three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question up to 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:

Same as in Section A.

Section – I

Therapeutic Exercise: 50 Hrs

1. Principle, Classification, techniques, physiological & therapeutic effects, indications & contraindications of therapeutic exercises. Also, study aerobic and anaerobic exercises.

2. Assessment & evaluation of a patient (region wise) to plan a therapeutic exercise programme.

3. Joint Mobility – Etiogenesis of joint stiffness, general techniques of mobilization, effects, indications, contraindications & precautions.
4. Muscle Insufficiency – Etiogenesis of muscle insufficiency (Strength, tone, power, endurance & volume), general techniques of strengthening effects, indication, contraindications & precautions.

6. Functional re-education – General therapeutic techniques to re-educate ADL function.

Section – II

**Posture, Balance Gait**  
30Hrs

Normal Posture = Overview of the mechanism of normal posture

Static and Dynamic Balance – Assessment & management including therapeutic exercises.

Gait-Overview of normal gait & its components.

Gait deviations – Assessment types, etiogenesis, management, including therapeutic exercises.

Types of walking aids, indications, efforts and various training techniques.
Section – III

Hydrotherapy

1. Basic Principles of fluid mechanics as they relate to hydrotherapy.
2. Physiological & therapeutic effects of hydrotherapy including joint mobility muscle strengthening & wound care etc.
3. Types of Hydrotherapy equipment, indications, contraindications, operation skills & patient preparation.

Section – IV

Special Techniques:

1. Introduction to special mobilization & manipulation techniques, effects, indications & contraindications.
2. Conceptual framework, principle of proprioceptive neuromuscular facilitation (PNF) techniques, including indications, therapeutic effects and precautions.
3. Principles of traction, Physiological & therapeutic effects classification, types, indications, contraindications, techniques of application, operational skills & precautions.
4. Review normal breathing mechanism types techniques, indications, contraindications, therapeutic effects & precaution of breathing exercises.
5. Group Therapy – Types advantages & disadvantages.
6. Exercises for the normal person =- Importance and effects of exercise to maintain optimal health & its role in the prevention of diseases. Types, advantages disadvantages, indications, contraindications & precautions for all age groups.

Exercise Therapy – II (Practical)

1. To practice assessment & evaluative & evaluative procedures, including motor, sensory, neuromotor co-ordination, vital capacity, limb length & higher functions.
2. To study & practice the various techniques of mobilization of joints region wise.
3. To study & Practice the various techniques of progressive strengthening exercises of muscles region wise.
4. To study & Practise the use of various ambulation aids in gait training.
5. To assess & evaluate evaluate ADL’s and practice various training techniques.
6. To study & practice mat exercises.
7. To assess & evaluate normal & abnormal posture & practice various corrective techniques.
8. To assess & evaluate equilibrium/ balance & practice various techniques to improve balance.
9. To study the structure & functions of hydrotherapy equipments & their applications.
10. To study & practice various traction techniques, including manual, mechanical & electrical procedures.
11. To study & practice various group exercise therapies.
12. To practice & experience effects of basic Yoga “asanas”.
13. To study, plan & Practice exercise programmes for normal persons of various age groups.
Books Suggested:

3. Therapeutic Exercise Foundations and Techniques Kisner & Colby – F.A. Davis
8. Aquatic Exercise Therapy- Bates and Hanson – W.B. Saunders.
Paper – V Biomechanics

Time: 3 Hrs.
Theory: 80 + 20 Int. Assess. = 100
Practicals: 40 + 10 Int. Assess. = 50
Teaching hours: Theory = 75 Hrs  Practical = 75 Hrs

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with answer to each question up to five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question up to three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question up to 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:

Same as in Section A.

Section – I Mechanics

10 Hrs

a) Introduction to mechanics including motion, forces, parallel forces system.

b) Newton’s law of motion, concurrent force systems – composition forces, muscle action line etc.

c) Centre of Gravity, line of gravity, stability and equilibrium.

Section – II Joint Structure and Function : 20 Hrs
a) Basic principles of Joint design and a human joint.
b) Tissues present in human joint including fibrous tissue, bone cartilage and connective tissue.
c) Classification of joints.
d) Joint function, Kinematics chains and range of motion.
e) Recall anatomy and study the biomechanics of the spine, shoulder girdle, joints of the upper extremity, pelvic girdle and the joints of the lower extremity.

Section – III Muscle Structure and function : 15 Hrs

a) Mobility and stability functions of muscle.
b) Elements of muscle structure and its properties.
c) Types of muscles contractions and muscle work.
d) Classification of muscles and their functions.
e) Group action of muscles, Co-ordinated movement.

Section – IV Posture & Gait : 30Hrs

a) Posture – Definition, factors responsible for posture, relationship of gravity on posture.
b) Postural imbalance – factors responsible for imbalance in Static and dynamic positions including ergonomics.
c) Description of Normal gait, determinants of gait, spatio temporal features and analysis.
d) Gait deviations – Types, Causative factors and analysis.

PRACTICALS - TEACHING HOURS 75 HRS

MARKS
1. To study the effects of forces on objects.
2. To find out the C.G. of an object.
3. To identify axis and planes of motion at the joints of
spine, shoulder, girdle, joints of upper extremity, Pelvic girdle and joints of lower extremity.

4. To study the different types of muscle contraction, muscle work, group action of muscles of co-ordinated movements.

5. Analysis of Normal posture respect to L.O.G. and the optimal position of joints in Antro-posterior and lateral views.

6. Analysis of normal gait and measurement of spatic temporal features.

Books Suggested:

4. Basic Biomechanics explained – Low & Reed – Butterworth Heinmann.

Paper–VI Sociology & Psychology

Time: 3 Hrs.  Theory: 80 + 20 Int. Assess. = 100
Teaching hours: Theory = 100 hours (50+50)

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A: SOCIOLOGY

Question 1: This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B: PSYCHOLOGY

Same as in Section A.

SECTION A: SOCIOLOGY (Teaching Hours= 50)

1. Introduction: Definitions of sociology, sociology as a science of society, uses of the study of sociology, application of knowledge of sociology in physiotherapy and occupational therapy. 5 Hrs

2. Sociology & Health: Social factors affecting health status, social consciousness and perception of illness, social consciousness and meaning of illness, decision making in taking treatment. Institutions of health, their role in the improvement of the health of the people. 5 Hrs

3. Socialization: Meaning of socialization, influence of social factor on personality, socialization in hospitals, socialization in the rehabilitation of patients. 3 Hrs

4. Social groups: Concept of social groups, influence of
5. Family: Influence of family on human personality, discussion of changes in the functions of a family, influence of family on the individual's health, family and nutrition, the effects of sickness on family, and psychosomatic disease.  

4 Hrs

5 Hrs

7. Culture: Components of culture. Impact of culture on human behaviour, cultural meaning of sickness, response & choice of treatment (role of culture as social consciousness in moulding the perception of reality), culture induced symptoms and disease, sub - culture of medical workers.  

4 Hrs

2 Hrs

9. Social change: Meaning of social change, factors of social change, human adaption and social change, social change and stress, social change and deviance, social change and health programmes, the role of social planning in the improvement of health and in rehabilitation.  

4 Hrs

10. Social Control: Meaning of social control, role of norms, folkways, customs, morals, religion, law and other means of social control in the regulation of human behaviour, social deviance and disease.  

3 Hrs

11. Social Problems of the Disabled: Consequences of the following social problems in relation to sickness and disability; remedies to prevent these problems:  

5 Hrs

a. Population explosion
b. Poverty and unemployment Beggary
c. Juvenile delinquency
d. Prostitution
e. Alcoholism
f. Problems of women in employment

12. Social Security: Social security and social legislation in relation to the disabled.  \textbf{3 Hrs}

13. Social Worker: The role of medical social worker.  \textbf{3 Hrs}

\textbf{Books Suggested:}

1. Megee - Sociology - Drydon Press Illinois
2. Kupuswamy – Social Changes in India - Vikas, Delhi
3. Ahuja - Social Problems - Bookhive, Delhi
5. Parter & Alder - Psychology & Sociology applied to medicine - W.B.Saunders.

\textbf{Section – B: Psychology  \hspace{1cm} (Teaching Hours: 50 Hrs)}

\textbf{General Psychology}

1. Definition of Psychology  
   \hspace{1cm} Definition of psychology, information in relation to following schools methods and branches.

   a) Schools  
   \hspace{1cm} Structuralism, functionalism, behaviourism, psychoanalysis, gestalt psychology

   b) Methods  
   \hspace{1cm} Introspection, observation, inventory and experimental method.

   c) Branches  
   \hspace{1cm} General, child, social, abnormal, industrial, clinical,

2. \textbf{Heredity and Environmental}: Twins, Relative importance of heredity and environmental, their role in relation to physical characteristics, intelligence and personality, nature - nature controversy.

4. Intelligence: Definitions, IQ, Mental Age, List of various intelligence tests - WAT, WISC, Bhatia's performance test, Raven's Progressive Matrices test.

5. Motivation: Definitions: Motive, drive, incentive and reinforcement, Basic information about primary needs: hunger, thirst, sleep, elimination activity, air, avoidance of pain, attitude to sex.

Psychological needs: Information, security, self-esteem, competence, love and hope.

7. Personality:

a) Definitions: List of components: Physical characteristics, character, abilities, temperament, interest and attitudes.

b) Discuss briefly the role of heredity, nervous system, physical characteristics, abilities, family and culture of personality development.

c) Basic concepts of Freud: unconscious, conscious, Id, ego and superego, List and define the oral, anal and phallic stages of personality department list and define the 8 stages as proposed by Erickson, 4 concepts of learning as proposed by Dollard and
Miller; drive, cue, response and reinforcement.

d) Personality assessment: interview, standardized, non-standardized. Exhaustive and stress interviews, list and define inventories BAI, CPI and MMPI, projective test Rorschach, TAT and sentence completion test.

8. Learning: Definition: List the laws of learning as proposed by Thorndike. Types of learning: Briefly describe, classical conditions, operant conditioning, insight, observation and Trial and Error type list the effective ways to learn: Massed Vs. Spaced, Whole Vs. Part, Recitation Vs. Reading; Serial Vs. Free Recall, knowledge of results, Association Organization, Mnemonics methods, incidental Vs. Intentional learning, role of language.

9. Thinking: Definition, concepts, creativity, steps in creative thinking, list of traits of creative people, delusions.

a) List of senses: Vision, Hearing, Olfactory, Gustatory and cutaneous sensation, movement, equilibrium and visceral sense. Define attention and list factors that determine attention: nature of stimulus intensity, colour, change, extensity, repetition, movement, size, curiosity, primary motives.

b) Define perception and list the principles of
perception: Figure ground, constancy, similarity, proximity, closure, continuity values and interest, past experience context, needs, moods, religion, sex and age, perceived susceptibility, perceived seriousness, perceived benefits and socioeconomic status.

c) Define illusion and hallucination.

d) List visual, auditory, cutaneous, gustatory and olfactory hallucination.

12. Democratic and Authoritarian Leadership: Qualities of leadership: Physical factors, intelligence, self-confidence, sociability, will and dominance. Define attitude, Change of attitude by: Additional information, changes in-group affiliation, enforced modification by law and procedures that affect personality (Psychotherapy, Counseling and religious conversion).

**Health Psychology**

1. Psychological Reactions of a Patient: Psychological reactions of a patient during admission and treatment anxiety, shock, denial, suspicion, questioning, loneliness, regression, shame, guilt, rejection, fear, withdrawal, depression, egocentricity, concern about small matters, narrowed interests, emotional over reactions, perpetual changes, confusion, disorientation, hallucinations, delusions, illusions,
anger, hostility, loss of hope.

2. Reactions to Loss: Reactions to loss, death and bereavement shock and disbelief, development of awareness, restitution, resolution: Stages of acceptance as proposed by Kubler–Ross.

4. Communications:
   a) Types verbal, non-verbal, elements in communication, barriers to good communication, developing effective communication, specific communication techniques.
   b) Counseling: Definition, Aim, differentiate from guidance, principles in counseling and personality qualities of counselors.

6. Emotional Needs: Emotional needs and psychological factors in relation to unconscious patients, handicapped patients, bed-ridden patients, chronic pain, spinal cord injury, paralysis, cerebral palsy, burns, amputations, disfigurement, head injury, degenerative disorders, parkinsonism, leprosy, incontinence and mental illness.

7. Geriatric Psychology: Specific psychological reactions and needs of geriatric patients.

8. Pediatric Psychology: Specific psychological

11. Personality Styles: Different personality styles of patients.

Books Suggested:

1. Introduction to Psychology - Mums - I.D.P. Co.

BPT Third Year

(Total Theory + Practical/Clinical = 1000 hours)

Paper – I Orthopaedics

Time: 3 Hrs.

Theory: 80 + 20 Int. Assess. = 100
Practical: 80 + 20 Int. Assess = 100

Teaching hours: Theory = 100, Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with answer to each question up to five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question up to three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question up to 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:

Same as in Section A.

Section I: 10 Hrs

1. **Introduction to Orthopaedics** – Introduction to orthopaedic terminology. Types of pathology commonly dealt with, clinical examination, common investigations X-rays & imaging techniques and outline of non-operative management.

2. **Principles of operative treatment**: List
indications, contraindication and briefly outline principles of: Arthrodesis, Arthroplasty, Osteotomy, Bonegrafting Tendon – Transfers and Arthroplasty.

3. **Sprains, Strains & Contractures** :- List common sites of sprain, strains & contractures and describe the clinical manifestations and treatment. Viz. tennis elbow, golfer’s elbow. Dequervan’s disease, tenovaginitis, trigger, finger, carpal tunnel syndrome and plantar fasciitis etc.

4. **Sports Injuries** :- Injuries related to common sports their classification and management.

**Section – II**

1. **Fractures and Dislocations** : General Principles, outline the following :

   (i) Types of Fractures including patterns. Open & closed fractures and fracture dislocations.

   (ii) Differences between dislocation & sublocation.

   (i) General & Local signs & symptoms of fractures & dislocation.

   (ii) Principle of management of fractures & dislocations.

   (iii) Prevention & treatment of complication including. Fracture – disease, Volkmann’s ischaemic contracture, Sudeek’s Atrophy, Carpal Tunnel Syndrome, Myositis ossificans and shoulder – hand syndrome.

   (iv) Fracture healing.
2. Upper Limb Fractures & Dislocations
   a) Enumerate major long bone fractures and joint injuries.
   b) Briefly describe their clinical features, principles of management and complications.

3. Lower Limb Fractures & Dislocations.
   a) Enumerate major long bone fractures and joint injuries.
   b) Briefly describe their clinical features, principles of management and complication.

4. Spinal Fractures and Dislocations: Outline the mechanism, clinical features, principles of management and complications of spinal injuries.

5. Recurrent Dislocations: Outline the mechanism, clinical features, principles of management and complications of recurrent dislocation of the shoulder and patella.
Section III

1. Amputations

a) Classify amputations, List indication for surgery.

b) Outline pre-operative, operative and prosthetic management.

c) Outline prevention and treatment of complications.

2. Bone & Joint Infections: Outline the etiology, clinical features, management and complications of septic arthritis, osteomyelitis, Tuberculosis (including spinal T.B.).

3. Bones Joint Tumors: Classify the outline the clinical features, management and complications of the following (benign / malignant bone and joint tumors: osteomas, osteosarcomas, osteoclastomas, Ewing’s sarcoma, multiple myeloma.

Section IV

3. Spinal Deformities: Classify spinal deformities and outline the salient clinical features, management and
Section - V 30 Hrs

2. Congenital Deformities: Outline the clinical features and management of CTEV, CDH, Flat foot, vertical talus, limb deficiency (radial club hand and femoral, tibial and tibula deficiencies meningomyelocele, Arthrogryphosis multiplex congenia and Osteogenesis imperfect, Cerebral palsy.

3. Peripheral Nerve Injuries: Outline the clinical features and management, including reconstructive surgery of:
   a) Radial, median and unlar nerve lesions.
   b) Sciatic and lateral popliteal lesions.
   c) Brachial Plexus injuries including Erbs, Klumpke’s and crutch palsy.

5. Leprosy: Outline of clinical features, management and complications of neuritis, muscle paralysis, tropic ulceration and hand and feet deformities.
Books Suggested:

Paper II General Medicine

Time: 3 Hrs.  
Theory: 80+ 20 Int. Assess. = 100 
Practical: 80+ 20 Int. Assess = 100

Teaching hours: Theory = 100, Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question upto three pages in length. One
question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

**Question 3:** This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

**Section B:**

Same as in Section A.

**Section I :**

25 Hrs

Introduction to modes of transfer of communicable diseases & general preventive measures.

Bacterial Diseases : Tuberculosis, Leprosy, Rheumatic fever, Tetanus, Typhoid fever, Diphtheria, Pneumonia, Bacillary Dysentery and Measles.

Metabolic and Deficiency Diseases : Diabetes, Anemia, Vitamin & Nutritional Deficiency diseases, diseases of the endocrine glands.

**Section II**

30 Hrs

1. **Common Diseases of Respiratory System :**

Asthma, Bronchitis, Massive collapse of lungs, Bronchiectasis Bronchial Pneumonia, lung abscess, Emphysema, Empyema, Paralysis of diaphragm and vocal cords, chronic infection of larynx and trachea. Abnormalities of tracheal infract of lungs, chronic passive congestion, chronic obstructive pulmonary disease, chest wall deformities.
2. **Common Diseases of Circulatory System:**
   Thrombosis, Embolism, Gangrene, Valvular disease, Hemorrhage, various diseases of arteries, diseases of blood forming organs, Anemia, Peripheral Vascular diseases, disease of the lymphatic systems: Diseases of the heart – Hypertension, Hypotension, Aortic aneurysm. Endocarditis, Pericarditis, Cardiac failure, coronary heart diseases, congenital heart malformation and its manifestation etc.

3. **Diseases of Digestive Systems:** Pharyngitis, spasm of the Oesophagus, Diverticulum stenosis, Gastric ulcer, Hememesis, Pyloric stenosis, Dyspepsia, Vomiting, Diarrhoea, Duodenal ulcer etc.

4. **Diseases of Liver:** Jaundice Cirrhosis of liver, Abscess of liver, Ascitis.

5. **Diseases of Kidney:** Polyuria, Hematuria, Uremia, Anuria, Nephritis, Urinary infections, Urinary calculi.

---

**Section III**

**Diseases of Skin**

1. Characteristics of normal skin, abnormal changes, types of skin lesions.

Section IV: Paedics

1. Review normal foetal development & child birth, including assessment of a neonate.

2. Development of a normal child – neuromotor, physical growth, cognitive, intellectual, social etc.

3. The examination and assessment of a pediatric patient.

10. Surgical intervention – Indications & common surgical procedure.
Section V Geriatrics

Books Suggested:

**Paper – III Physiotherapy in Orthopaedic Conditions**

Time: 3 Hrs.

Theory: 80 + 20 Int. Assess. = 100

Practical: 80 + 20 Int. Assess = 100

Teaching hours: Theory = 125, Practical = 150

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

**Question 1:** This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

**Question 2:** This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

**Question 3:** This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:
Theory

1. Brief review of the following surgical condition and various physiotherapeutic modalities, aims, means and technique of physiotherapy should be taught.
   10 Hrs

2. Traumatology General physiotherapeutic approach for the following conditions:
   40 Hrs
   
   A. Fracture and dislocations; Classification and type of displacement, method of immobilization, healing of fractures and factors affecting union, delayed union etc. common sites of fractures.
   20 Hrs

   B. Specific fractures and their complete physiotherapeutic management.
   20 Hrs

   Upper Limb; Clavical, humerus, ulna, radius, crush injuries of land.

   Lower Limb; fracture neck of femur, shaft of femur patella tibia fibula, pott’s fracture, fracture of tarsal and metatarsals.

   Spine : fracture and dislocations of cervical, thoracic and lumber vertebrae with and without neurological deficits.

3. Surgical procedures; Pre and post operative management of common corrective procedure like arthroplasty, arthrodesis, osteotomy, tendon transplants, soft tissue release grafting, including polio residual paralysis and leprosy deformities corrections.
   15 Hrs
4. Injuries: Soft tissue injuries, synovitis, capsulitis volkman's ischemic contracture etc. tear of seminalar cartilage and cruciate ligaments of knee, menisceotomy, patellectomy, internal derangement of knee.  

10 Hrs

5. Amputation; level of amputation of upper limb and lower limb, stump care, stump bandaging, pre and post prosthetic management including check out of prosthesis, training etc.  

10 Hrs

6. Deformities; congenital torticollis and cervical rib, CTEV, Pes cavus, pes planus and other common deformities.

Acquired – Scoliosis, kyphosis, lordosis, cox vara, genu valgum, genu varum and recurvatum.  

10 Hrs

7. Degenerative and infective conditions: osteoarthritis of major joints, spondylosis, spondylitis spondylolisthesis, PIVD, Periarthritis of shoulder, Tuberculosis of spine, bone and major joint, perthes disease Rheumatoid arthritis, Ankylosing spondylitis etc. and other miscellaneous orthopaedic conditions treated by physiotherapy.  

15 Hrs

15 Hrs

Practical

Various physiotherapy modalities and treatment techniques for the above mentioned conditions to be demonstrated and practiced by the students in clinical setup.
Books Suggested:

7. Orthopaedic Physiotherapy Tids well – Mosby.

Paper – IV Physiotherapy in Medical Conditions

Time: 3 Hrs.

Theory: 80+ 20 Int. Assess. = 100
Practical: 80+ 20 Int. Assess = 100

Teaching hours: Theory = 125, Practical = 150

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with
answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

**Question 2:** This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

**Question 3:** This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

**Section B:**

Same as in Section A.

**Section 1: General Medicine 30 Hrs**

Review of the Pathological and principles of management by Physiotherapy to the following conditions:

1. Inflammation – acute, chronic and supprative.

2. Oedema – Traumatic, obstructive, Paralytic, Oedema due to poor muscle and laxity of the fascia.

3. Arthritis and Allied Conditions (in details):
   a) Osteo – arthiritis – generalized, Degenerative and traumatic, spondylosis and disorders.
   b) Rheumatoid Arthritis, Still’s disease, infective Arthritis.
   c) Spondylitis, Ankylising Spondylitis.
   d) Nonarticular Rheumatism – Fibrositism, Myalgia, bursitis, Periarthritis etc.

4. Common conditions of Skin – Acne, Psoriasis,
Alopecia, Leucoderma, Leprosy, Sexually transmitted diseases.

5. Deficiency diseases – Rickets, Diabetes, Obesity, Osteoporosis and other deficiency disorders related to Physiotherapy.

6. Psychiatric Disorders – Psychosis, Psychoneurosis, Senile dementia.

Section II Respiratory

1. Review of mechanism of normal respiration.

2. Chest examination, including auscultation, percussion.

3. Knowledge of various investigative procedures (invasive and noninvasive) used in the diagnosis of various respiratory disorders.

Review of pathological changes and principle of management by physiotherapy of the following conditions:

1) Bronchitis, Asthma, Lung abscess, Bronchiectasis, Emphysema, COPD.

2) Pleurisy and Empyema, Pneumonia.

3) Bacterial Disease.

4) Rheumatic fever, carcinoma of respiratory tract.

5) Paralysis of diaphragm and vocal cords.

6) Chest wall deformities.
Section III: Cardiovascular  25 Hrs

1. Review of anatomy and physiology of the cardiovascular system.

2. Knowledge of various investigative procedures (invasive and noninvasive) used in the diagnosis of various cardiovascular disorders.

3. Review of the pathological changes and principle of management by physiotherapy of the following conditions:

- Thrombosis
- Embolism
- Buerger's diseases
- Arteriosclerosis
- Thrombophlebitis
- Phlebitis
- Gangrene
- Congestive Cardiac failure
- Hypotension
- Aneurysm

Section IV: Paediatrics  25 Hrs

A. Review of the examination & assessment of a Paediatric patient.

B. Review of pathological changes and principle of management by physiotherapy of the following conditions:

1) Common congenital & acquired musculo skeletal disorders.

2) Common congenital & acquired neurological disorders (CNS & PNS).

3) Common heredity disorders.

4) Common nutritional, metabolic and vitamin deficiency disorders.
5) Cerebral palsy, myopathy and muscular dystrophies.

Section V Geriatrics

B. Review of pathological changes and principle of management by physiotherapy of the following conditions:

1) Musclo skeletal disorders

2) Cardiopulmonary disorders.

3) Neurological disorders (CNS & PNS).

4) Injuries & accidents specific to the aged.

Books Suggested:

1. Cash’s Textbook of general medical and surgical conditions for Physiotherapists - Downie – Jaypee Brothers.

2. Essentials of Cardiopulmonary physical therapy – Hillegass & Sadowsky – W.B. Saunders.

7. ACSM Guideliness for Exercise testing and Prescription – ACSM – Williams and Wilkins.

**Paper - V Research Methodology and Biostatistics**

Time: 3 Hrs.  
Theory: 80+ 20 Int. Assess. = 100  
Teaching hours: Theory = 50

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

**Section A:**

**Question 1:** This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

**Question 2:** This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This
question will consist of 10 marks.

**Question 3:** This will consist of two long answer questions with answer to each question up to 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

**Section B:**

Same as in Section A.

**Research Methodology**

**Section I:**

1. **Introduction:** Importance of research in clinical practice, scientific approach, characteristics, purposes and limitations.

2. Ethical issues in research, elements of informed consent.

3. Structure of a research proposal.

**Section II:**

1. Research Question including literature review.

3. Experimental sampling and design.

4. Descriptive research.

**Section III**

**Biostatistics**

1. Descriptive statistics.

2. Comparison of means, T-tests.
3. Analysis of Variance.
4. Multiple comparisons.
6. Correlations.
7. Application of common statistical tools & programs.

Books Suggested:

1. Methods in Biostatistics - Mahajan - J.P.

**BPT Fourth Year**

(Total Theory + Practical/Clinical = 1000 hours)

**Paper – 1** General Surgery

Time: 3 Hrs.  
Theory: 80+20 Int. Assess. = 100  
Practical: 80+20 Int. Assess = 100

Teaching hours: Theory = 100, Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by
separate examiners.

Section A:

**Question 1:** This will consist of five short answer questions with answer to each question up to five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

**Question 2:** This will consist of one medium answer question with answer to each question up to three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

**Question 3:** This will consist of two long answer questions with answer to each question up to 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:

Same as in Section A.

Section I: 10 Hrs

1. Introduction to principles of surgery and its procedure.

2. Shock – definition, types, clinical, feature, pathology & management.

3. Haemorrhage – common sites, complication, clinical features & management.

5. Anaesthesia – Principles of anaesthesia, types & procedure.

Section II 20 Hrs

1. Wounds, Tissue repair, Classification – Acute Wounds, Chronic wounds, Scars & their
Management.

2. Wound infections: Psychology & manifestation, Types of infections & their management.

3. Tumors and Ulcers:
   a) Tumors – Types of Management
   b) Ulcers – Types & Management.

4. Burns – Causes, Classification, Clinical features & Management.

5. Skin Grafting – Indications, Types & Procedures.

Section III 10 Hrs

3. Thoracic and Cardiac Surgery – Types of incision and common surgical procedures.

Section IV 20 Hrs

Obstetrics & Gynaecology

1. Pregnancy, stages of labour and its complications, indications and types of surgical procedures.

2. Gynaecological disorders – Salpingitis, parametritis, retro-uterus, prolapse of uterus, pelvic inflammatory
Section – V

Ophthalmology

2. Ptosis.

4. Refractions – testing, errors & remedies.

5. Strabismus – types, features & corrective measures.

Section VI

Ear, Nose & Throat (ENT)

1. Introduction – Outline, mechanism of audition, olfaction & speech.

2. Classify causes of hearing impairment, assessment techniques, conservative & surgical management.

4. Outline common ENT infections & lesions, which affect hearing, breathing, speech & their management.

5. Outline the function of vestibular organ, its common disorders & their management.
Books Suggested:

**Paper –II Neurology**

Time: 3 Hrs.

Theory: 80+ 20 Int. Assess. = 100

Practical: 80+ 20 Int. Assess = 100

Teaching hours: Theory = 100, Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

**Section A:**

**Question 1:** This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

**Question 2:** This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

**Question 3:** This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.
Section B:
Same as in Section A.

Section I:

1. Neuroanatomy: Review the basic anatomy of the brain and spinal cord including Blood supply of the brain and spinal cord, anatomy of the visual pathway, connections of the cerebellum and extrapyramidal system, relationship of the spinal nerves to the spinal cord segments, long tracts of the spinal cord, the brachial and lumbar plexus and cranial nerves.

2. Neurophysiology: Review in brief the Neuropathological basis of tone and disorders of the tone and posture, bladder control, muscle contraction, movement and pain.

3. Assessment and evaluate procedures for the neurological patient.

4. Review of the principles of the management of a neurological patient.

Section II:

Briefly outline the etiogenesis, clinical features and management of the following Neurological disorders

3. Trauma – localization, first aid and management of
sequealae of head injury and spinal cord injury.

5. Demyelinating diseases (central and peripheral) – Guillain – Bane syndrome, Acute disseminated encephalomyelitis, Transverse myelitis and Multiple sclerosis.

Section III 25 Hrs

Briefly outline the etiogenesis, clinical features and management of the following Neurological disorders:

1. Degenerative disorders – Parkinson's disease and dementia.

2. Infections – Pyogenic Meningitis sequelae, Tuberculous infection of central nervous system and Poliomyelitis.

3. Diseases of the muscle – Classification, signs, symptoms, progression and management.

Section – IV 20 Hrs

1. Epilepsy – Definition, classification and management.

2. Myasthenia Gravis – Definition, course and management.
3. Intracranial Tumors – Broad classifications, signs and symptoms.

5. Cranial nerve – Types of Disorders, clinical manifestation & management.

Section V: Psychiatry 15 Hrs

1. Introduction to neuropsychology: Definition, defence mechanism, symptomatology, types, causes, assessment of mental disorders, psychosomatic disorders.

2. Disorders:
   a) Psychosis – Schizophrenia (including paranoid) manic depressive psychosis, involvement psychosis.
   
   b) Psychoneurosis – Anxiety, hysteria, anxiety states, neurasthenia, reactive depression, obsessive compulsive neurosis.
   
   c) Organic reaction to – toxins, trauma & infection.
   
   d) Senile dementia.

3. Mental retardation – definition, causes manifestation and management.

4. Therapies:
   a) Psychotherapy – Group therapy,
Psychodrama, behaviour, modification, family therapy, play therapy, psychoanalysis, hypnosis.

b) Drug therapy.
c) Electro convulsive therapy.

Books Suggested:

2. Brain's Diseases of the Nervous System – Nalton – ELBS.

Paper – III Physiotherapy in Neurological Conditions
Time: 3 Hrs. Theory: 80+ 20 Int. Assess. = 100
Practical: 80+ 20 Int. Assess = 100

Teaching hours: Theory = 100, Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question
with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

**Question 3:** This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

**Section B:**

Same as in Section A.

**Theory**

**Section I : Neurology**

1. Examination of Neurological disorders and principles of treatment.

2. Knowledge of various investigative procedures (invasive & noninvasive) used in the diagnosis of various neurological disorders.

3. Review of pathological changes and principle of management & physiotherapy of the following conditions:
   
   a) Hemiplegia, Paraplegia, Tabes dorsalis, cerebellar ataxia, extra pyramidal lesions, Gullian Barre Syndrome, Parkinsonism.

   b) Disseminated sclerosis, Amgotrophic lateral sclerosis, Symgomyela subacute combined degeneration of cord motor neuron disease.

   c) Peripheral Nerve and cranial Nerve lesions.

   d) Neuritis and Neuralgia - Brachial, sciatic etc.

   e) Infections – Poliomyelitis, meningitis.
Encephalitis, Polyneuritis Transverse myelitis.

f) Traumatic head injuries and spinal cord injury.

Practical

Various Physiotherapy modalities and treatment techniques for above mentioned conditions should be demonstrated and practiced by the students.

Books Suggested:

Paper – IV Physiotherapy in Surgical Conditions

Time: 3 Hrs.
Theory: 80+ 20 Int. Assess. = 100
Practical: 80+ 20 Int. Assess = 100

Teaching hours: Theory = 100, Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:

Same as in Section A.

Section I: General Surgery, Eye & ENT

Review of pathological changes and principle of pre and post operative management by physiotherapy of the following conditions:

1. Common abdominal surgeries, including GIT, liver, spleen, kidney, bladder & Endoscopy etc.

2. Common organ transplant surgeries – heart, liver, bone marrow etc.

3. Common operations of the ear, nose, throat & jaw as
related to physiotherapy.

Section II : Thoracic Surgery 20 Hrs

Review of pathological changes and principle of pre and post operative management by physiotherapy of the following conditions :

1. Lobectomy, Pneumonectomy, Thoracotomy, Thoracoplasty & Key hole surgeries.

2. Corrective surgeries of congenital heart defects, angioplasties, blood vessel grafting, open heart surgeries & heart transplant.

Section III: Gynaecology and Obstetrics 20 Hrs

Common operation of reproductive system, including surgical intervention for child delivery Ante natal & post natal, physiotherapy.

Section IV - Wounds, Burns & Plastic Surgery 20 Hrs

Review of pathological changes and principle of pre and post operative management by physiotherapy of the following conditions :

1. Wounds, ulcers, pressure sores.

2. Burns & their complications.

Section V - Neurosurgery  

Review of pathological changes and principle of pre and post operative management by physiotherapy of the following conditions:

2. Common surgeries of vertebral column & spinal cord.
3. Common surgeries of peripheral nerves.
4. Surgical interventions in traumatic head injuries.

Books Suggested:

6. Physiotherapy in obstetrics and gynaecology –
Paper - V Physiotherapy Ethics, Administration & Rehabilitation,

Time: 3 Hrs.  
Theory: 80+ 20 Int. Assess. = 100  
Practicals: 80+ 20 Int. Assess. = 100

Teaching hours: Theory = 100  Practical = 100

Note: The question paper covering the entire course shall be divided into two sections. Each section to be attempted in a separate answer book and to be evaluated by separate examiners.

Section A:

Question 1: This will consist of Five short answer questions with answer to each question upto five lines in length. All questions will be compulsory. Each question will carry 3 marks total weightage being 15 marks.

Question 2: This will consist of one medium answer question with answer to each question upto three pages in length. One question will be set by the examiner and will be compulsory. This question will consist of 10 marks.

Question 3: This will consist of two long answer questions with answer to each question upto 5 pages in length. Two questions will be set by the examiner and the candidate will be required to attempt one. Each question will carry 15 marks.

Section B:

Section I: Physiotherapy Ethics  
20 Hrs

1. History of Physiotherapy.

2. Philosophy and Philosophical statements.

3. Major Ethical principles applied to moral issue in health care.

5. Scope of practice.

6. Relationships with patients.

7. Relationships with medical colleagues.

8. Relationships between professionals.

9. Relationships with in the profession.

10. Sale of goods.

Section II: Physiotherapy Administration  
10 Hrs

1. Responsibility and Confidentially.

2. Provision of services and advertising.

3. Professional and government licensing, Accreditation and Education standards.

4. Laws and Legal concepts:
   - Protection from Malpractice claims, Consumer Protection Act
   - Liability and Documentations.

Section III Principles of Rehabilitation

Section III A  
20 Hrs
1. Conceptual framework of rehabilitation, roles of rehabilitation team members, definitions and various models of rehabilitation.

2. Epidemiology of disability with emphasis on locomotor disability, its implications – individual, family, social, economic and the state.

3. Preventive aspects of disability and organizational skills to manage it.

4. Community Based Rehabilitation and out reach programmes to rehabilitate persons with disabilities living in rural areas.

5. Statutory provisions, Schemes of assistance to persons with disability.

6. Role of NGOs in rehabilitation of the persons with disabilities.

7. Basic principles of administration and finance including personnel management and budget preparation and procurement etc.

Section – III B

2. Fabrication of simple splints and self help devices for upper and lower extremity – indications and application.

3. Principles of Prosthetics – types, indications, contra-indications, assessment (check out), uses and fitting
upper and lower extremity.

Section III C

1. Principles and mechanisms of Communication including speech and hearing.

3. Principles in the management of vocational problems, including evaluation and vocational goals for people with disability.

4. Principles of rehabilitation Nursing, including function of Nursing personnel and Nursing practice in rehabilitation.

Section – III D

1. Identification, assessment and classification of mentally subnormal.

2. Etiogenesis and principles of management including prevention.

3. Rehabilitation of the mentally subnormal, including vocational training & home education programme.

Section – III E

1. Definition, scope & importance of Activities of Daily Living (ADLs).

2. The teaching and training of (a) wheel chair activities, (b) bed activities (c) transfer activities (d) Locomotor activities (e) Self care activities, such as
toilet, eating, dressing etc.

PRACTICALS

1. Introduction, Identification & Indications for the application of various aids & appliances like common splints, orthotics & prosthetic devices.
2. Visit to some NGO's dealing with persons with disabilities.
3. Learning basic principles of pre-vocational evaluation & occupational therapy.
4. Learning basic principles of vocational training.

Books Suggested:

4. Orthotics in Rehabilitation : Splinting the hand and the body – Mckee & Morgan – F.A. Davis.
