

**National Dental College , Dera Bassi**

Sr no.	Name of Candidates	Specialty	Topic of Thesis
01.	Dr. Akanksha Zutshi	MDS (Oral & maxillofacial Surgery)	Immediate implant placement and provisionalization in esthetic zone : clinical and radiographic evaluation of eight cases.
02.	Dr. Rohit Kumar	MDS (Oral & maxillofacial Surgery)	Platelet rich fibrin and demineralised bone matrix to promote bone regeneration after bilateral impacted third molar extraction – A comparative study
03.	Dr. Aanchal Gautam	MDS (Pedodontics and Preventive Dentistry)	Assessment of salivary immunoglobulin A, immunoglobulin G, total protein content and salivary parameters of relevance in children with early childhood caries.
04.	Dr. Navdeep Kaur	MDS (Pedodontics and Preventive Dentistry)	Evaluating the efficacy of resin infiltration, microabrasion, bleaching, CPP-ACP and their combinations in esthetic management of white spot lesions – An in vivo study
05.	Dr. Neha Saini	MDS (Pedodontics and Preventive Dentistry)	Assessing the efficacy of chemomechanical caries removal using carisolv and papacarie and conventional mechanical methods in deciduous and permanent teeth – An in vivo study
06.	Dr. Disha Mankoo	MDS (Conservative Dentistry & Endodontics)	Comparative evaluation of the microleakage and push-out bond strength of furcal perforation repair materials : MTA, biodentine and theracal – An in vitro study.
07.	Dr. Saloni Gupta	MDS (Conservative Dentistry & Endodontics)	An in vivo assessment of the effect of irrigants used as a final flush with different systems on the penetration of the irrigant into the root canal.
08.	Dr. Sunaina Sood	MDS (Conservative Dentistry & Endodontics)	Comparative analysis of incidence and intensity of post operative pain using different instrumentation techniques and irrigants in single visit root canal therapy
09.	Dr. Tirath Ram Garg	MDS (Conservative Dentistry & Endodontics)	An invitro assessment of the effects of different mechanical surface treatments on repair bond strength of aged composites
10.	Dr. Aastha Harnal	MDS (Periodontology)	Comparative evaluation of laser assisted & conventional open flap surgical debridement procedure in patients with chronic periodontitis
11.	Dr. Sandeep Kaur Bhullar	MDS (Periodontology)	Evaluation of effect of scaling and root planning on salivary CCL28 chemokine in smokers and non smokers suffering from chronic periodontitis – A clinical and biochemical study.
12.	Dr. Surbhi Verma	MDS (Periodontology)	Comparative evaluation of the tubular occlusion and mineralization properties of the surface layers formed by three different desensitizing dentrifices on dentin disc models – An in vitro study
13.	Dr. Uma Laxmi	MDS (Periodontology)	Evaluating the efficacy of a novel chemotherapeutic approach – combined antimicrobial therapy(CAT) in management of chronic periodontitis.
